

AI powered 3D Geospatial Platform

GIS collect + augment + Analysis +live + decision-making

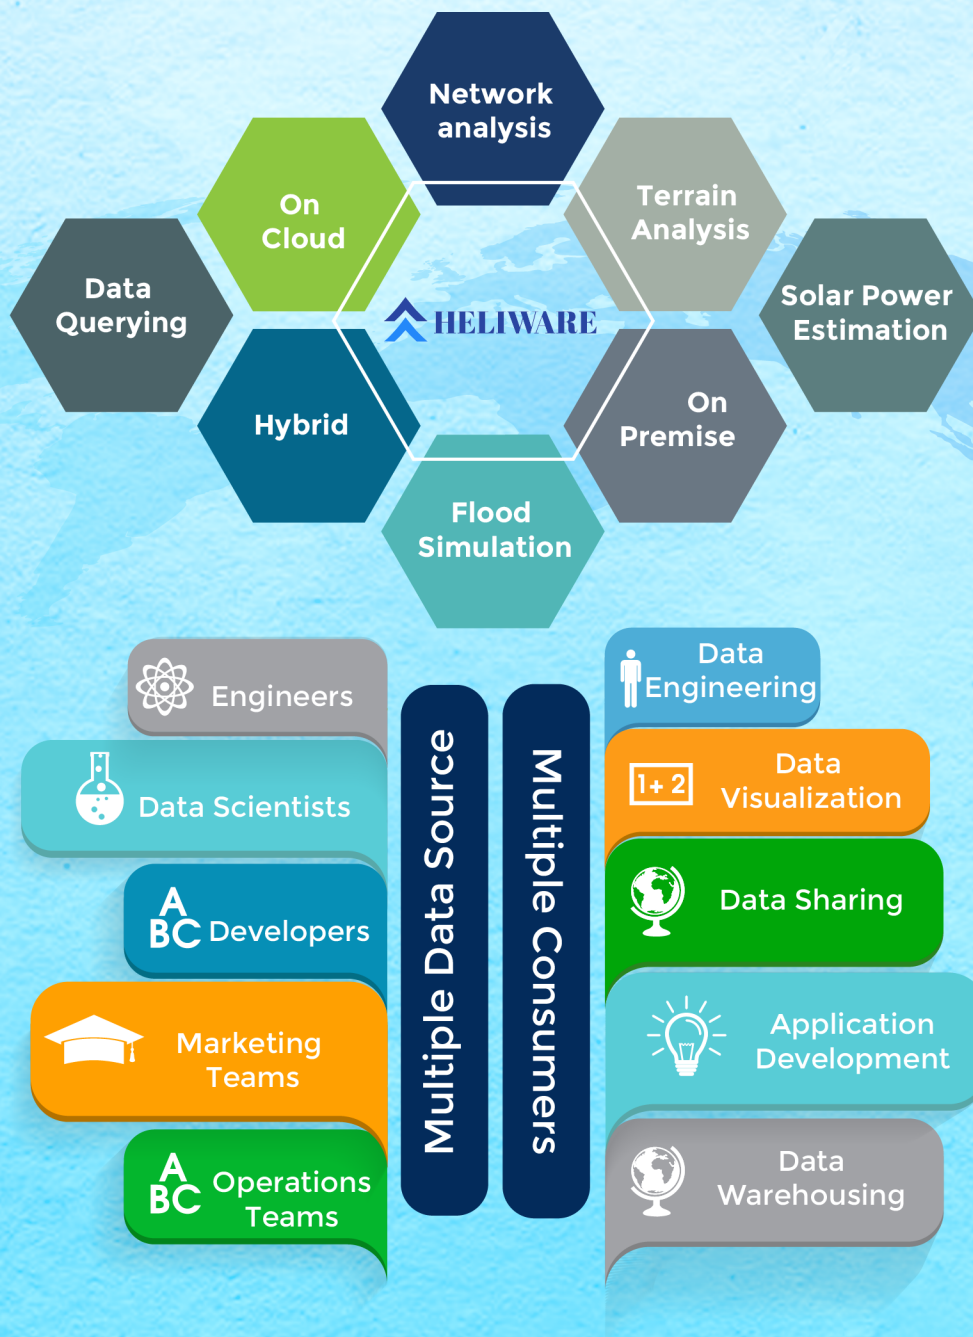

About Us

Heliware is a leading Geospatial start-up in India which provides no code Geospatial SDK, from data analysis to data warehousing on private and public server. In shortest period of time heliware has worked with defence, construction, solar and market research sector. Heliware is a leading Geospatial start-up in India which provides no code Geospatial SDK, from data analysis to data warehousing on private and public server.

Introducing

Heliware - One-Stack - Multiple Team - Private Cloud

WebGIS platform support satellite, drone data along with Video analysis and comparison.

You Name It, We Have It!

Geoprocessing Tools

Network Analysis

Overlay tools

3D point cloud to BIM

Raster & Vector Analysis

360 degree comparison

2D & 3D Tiling

**Change detection and
classification**

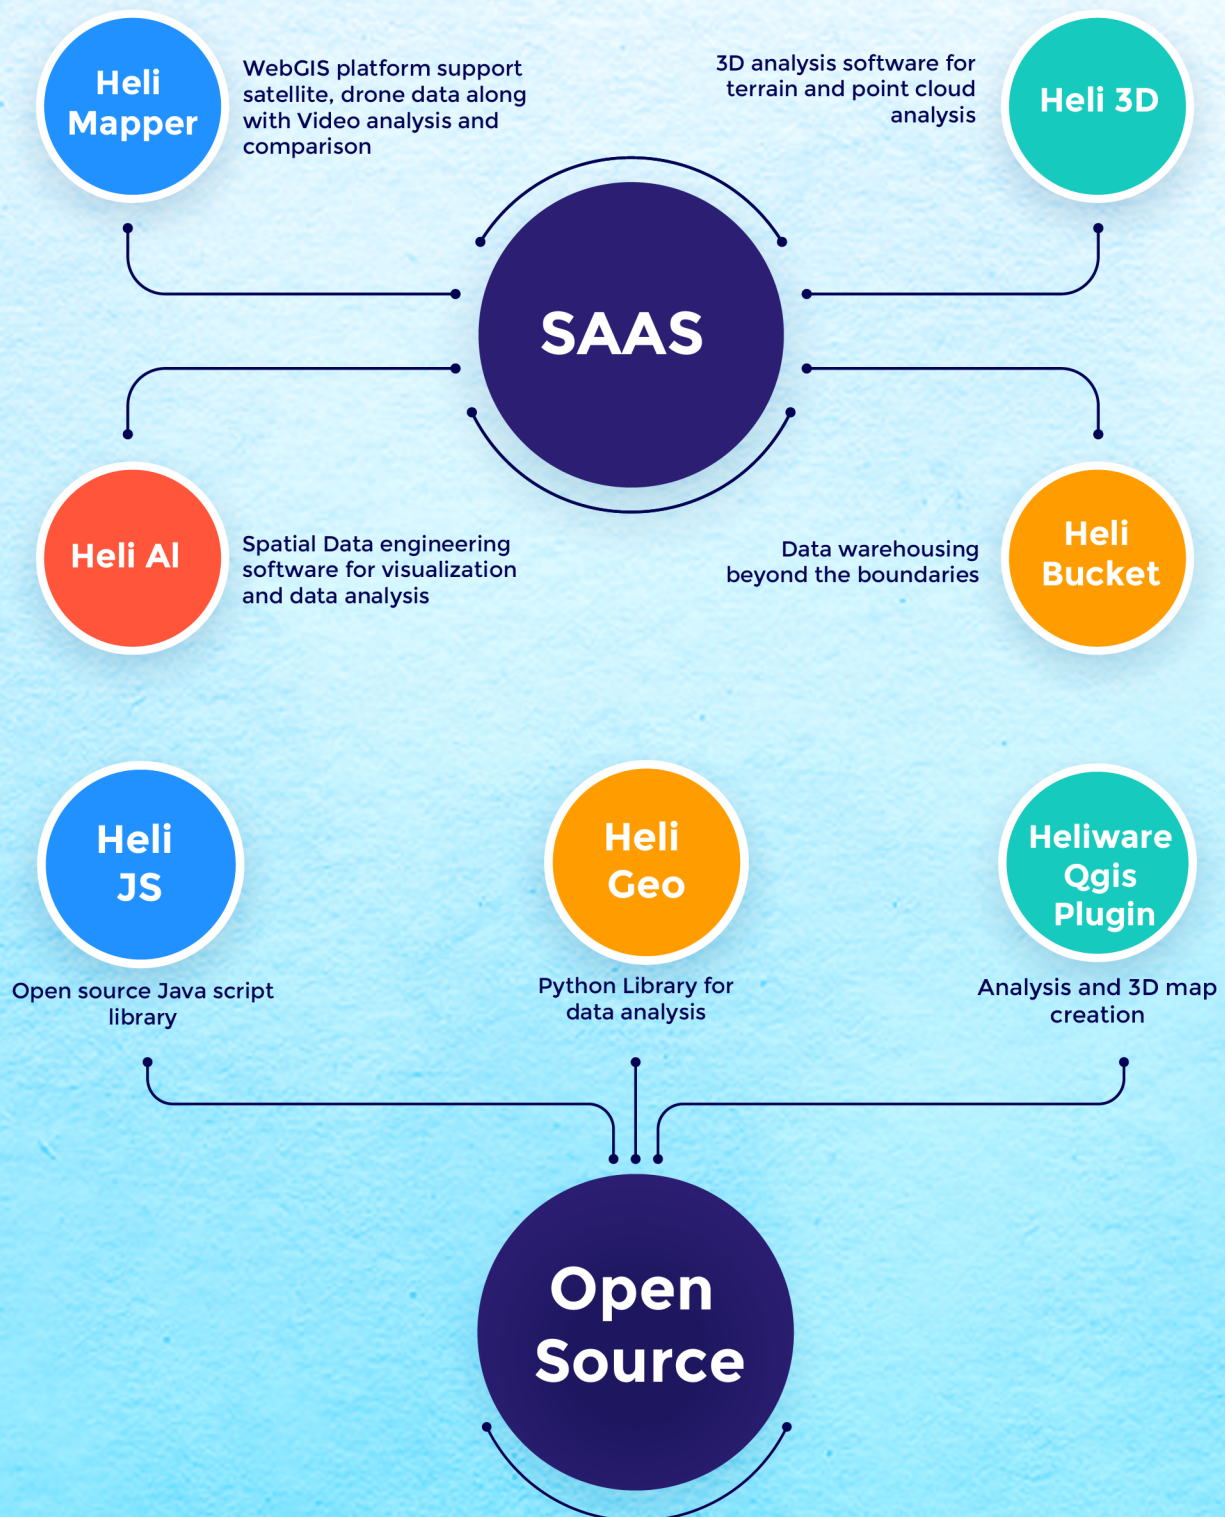

**Spatial Data Engineering
Platform**

Lidar & AV module

**Image and 3D
segmentation module**

Our Line of Products & Services

No code platform for geo- spatial software development

On Premise backend as a Service model for data analysis

Location based geodata- base Application

Private server based software & analysis solution using drone, dgps, satellite & other sensors data

Enterprise grade data warehousing

Customize sdk for software development

Analysis solution on private server

Industries We Serve

Earth Moving

Solar
Construction
(water, roadways & railways)
Urban Development

Terrain Analysis
Progress Monitoring
& comparison
Common visualization platform

Asset Moving

Logistics
Market Research
Delivery & Supply chain

Building & mapping stack
Spatial Data Engineering
Data mining

Mapping Stack

Logistics
Delivery & Supply chain

Routing
Network Analysis
Snap to Road

Defence

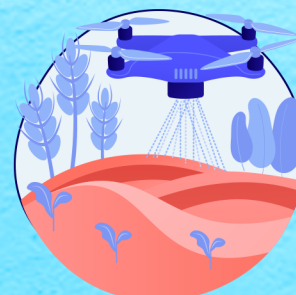

DRDO
Indian Navy
Indian Air Force
Indian Coast
Indian Armed force

3D Terrain
3D Simulation for
warzone & flight training
Video Surveillance

Mapping Stack

Precision Agriculture
Terrance Plantation
Moth Detection
Soil Analysis

Change Detection
Classification
Crop Prediction & monitoring
Simulation
Crop Health monitoring

Our Esteemed Clientele

Construction

Urban planning

**Trusted
by
Leaders**

Renewable energy

Logistics and supply chain

Geo spatial & drone companies
